Editorial Review

Review

"...This book (second edition) is written at an intermediate level...but may also be useful for those with more advanced knowledge. The strength of the book is that [Bellis] writes from a clinician's as well as a researcher's perspective and makes the 'hard science' parts interesting and relevant to those who are better versed in clinical than academic/ research skills.

The book is written in the style of an auditorium delivered live lecture...[T]he reasoning is easy to follow, and [Bellis] provides clinical scenario examples and occasionally draws similarities between central auditory processing disorders (CAPD) and other conditions to illustrate and make more accessible the point that she makes. The book synthesizes a great deal of information to make clinically relevant recommendations/ conclusions...This book is a good starting point for those wishing to understand this complex field, whether they are clinicians with little or no research experience, or researchers with little clinical exposure." --Dr. Dori-Eva Bamiou, MD, MSc, FRCP, PhD, UCL Ear Institute, ENT & Audiology News 22(5), (Nov/Dec 2013)

About the Author

Teri James Bellis, PhD, professor of audiology at The University of South Dakota, received her doctorate in audiology and hearing sciences with a specialty certification in language and cognition from Northwestern University. The author of *When the Brain Can't Hear: Unraveling the Mystery of Auditory Processing Disorder* (2002 Pocket Books), Dr. Bellis has been involved in the development, management, and implementation of audiologic and neurodiagnostic programs in clinical and educational settings, including multimodality evoked potentials programs and central auditory processing service delivery programs. She is an internationally recognized expert in auditory processing disorders and has lectured and published widely on the subject of central auditory processing assessment and management. Her writings have been featured in numerous audiology and medical journals, including the prestigious *Journal of Neuroscience*.

Users Review

From reader reviews:

Nancy Sanchez:

What do you in relation to book? It is not important to you? Or just adding material when you want something to explain what you problem? How about your free time? Or are you busy man or woman? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? All people has many questions above. The doctor has to answer that question because just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need that *Assessment and Management of Central Auditory Processing Disorders in the Educational Setting: From Science to Practice* to read.
