Data Structures and Abstractions with Java (3rd Edition) By Frank M. Carrano

Data Structures and Abstractions with Java, 3e, is ideal for one- or two-semester courses in data structures (CS-2) in the departments of Computer Science, Computer Engineering, Business, and Management Information Systems.

This is the most student-friendly data structures text available that introduces ADTs in individual, brief chapters — each with pedagogical tools to help students master each concept. Using the latest features of Java, this unique object-oriented presentation makes a clear distinction between specification and implementation to simplify learning, while providing maximum classroom flexibility.

Author Frank Carrano's **Making it Real blog** <http://frank-m-carrano.com/blog/> extends his textbooks and lectures to a lively discussion with instructors and students about teaching and learning computer science.
