Surface Science: Foundations of Catalysis and Nanoscience By Kurt W. Kolasinski

Surface Chemistry is an essential and developing area of physical chemistry and one that has become increasingly multidisciplinary. Surface Science: Foundations of Catalysis and Nanoscience offers a comprehensive, modern introduction to the subject, taking a truly pedagogical approach. This text will provide the reader with a well-rounded understanding, not only of how chemistry works at surfaces, but also how to understand and probe the dynamics of surface reactions.

Starting with an examination of the importance of heterogeneous reactions, it lays the foundations for an understanding of chemical reactions at surfaces through a detailed treatment of surface electronic and geometric structure. Reactivity on and with surfaces is clearly explained. Fundamental principles such as adsorption, desorption and reactions between adsorbates are examined, with extensive coverage of developments in the growth of epitaxial, and Langmuir-Blodgett films, as well as treatment of the etching of surfaces.

Surface Science: Foundations of Catalysis and Nanoscience:

- * Features a modern molecular view of surfaces combined with a careful pedagogic approach to chemical reaction dynamics
- * Introduces both theoretical and experimental techniques including a detailed explanation of growth and etching.
- * Includes numerous examples of the relevance of surface chemistry to industrial processes combined with end of chapter problems and an extensive bibliography. Suitable for all students taking courses in surface chemistry in departments of chemistry, physics, chemical engineering and material science, as well as researchers and professionals needing an up to date review of the subject.

Editorial Review

Users Review

From reader reviews:

Virginia Higgins:

Nowadays reading books become more and more than want or need but also become a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want send more knowledge just go with education books but if you want feel happy read one using theme for entertaining for example comic or novel. Often the Surface Science: Foundations of Catalysis and Nanoscience is kind of e-book which is giving the reader erratic experience.

Annamarie Hernandez:

Playing with family within a park, coming to see the coastal world or hanging out with buddies is thing that usually you could have done when you have spare time, then why you don't try thing that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Surface Science: Foundations of Catalysis and Nanoscience, you may enjoy both. It is good combination right, you still want to miss it? What kind of hangout type is it? Oh occur its mind hangout people. What? Still don't get it, oh come on its called reading friends.

Donald Spada:

In this time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The particular book that recommended for you is Surface Science: Foundations of Catalysis and Nanoscience this book consist a lot of the information on the condition of this world now. This specific book was represented how do the world has grown up. The dialect styles that writer use for explain it is easy to understand. The particular writer made some investigation when he makes this book. That's why this book appropriate all of you.

Connie Hockaday:

What is your hobby? Have you heard in which question when you got scholars? We believe that that concern was given by teacher on their students. Many kinds of hobby, All people has different hobby. And also you

know that little person such as reading or as looking at become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is this Surface Science: Foundations of Catalysis and Nanoscience.
