### Biological Control in Plant Protection: A Colour Handbook, Second Edition

By Neil Helyer, Nigel D. Cattlin, Kevin C. Brown

There has been a large increase in the commercial use of integrated crop/pest management methods for pest and disease control on a wide range of crops throughout the world since the first edition of this book. The completely revised second edition of the bestselling **Biological Control in Plant Protection: A Color Handbook** continues the objective of providing a handbook with profiles and full-color photographs of as many examples of biological control organisms from as wide a global area as possible. It is designed to help readers anticipate and recognize specific problems of pest management and then resolve them using the natural enemies of pests?parasites, predators, and pathogens.

The authors first describe the impact of predator-prey relationships on host plant species in arable, orchard, and protected environments. The main sections of the book include profiles of pests, beneficial arthropods (insects and mites), and beneficial pathogens (bacteria, fungi, viruses, and nematodes), featuring a tabular pest identification guide. Descriptions of biocontrol organisms are divided into four sections: species characteristics, lifecycle, crop/pest associations, and influences of growing practices. The text is illustrated throughout with color photographs of the highest quality.

This revised edition helps readers more fully understand the concepts and practice of biological control and integrated pest management. All chapters have been updated and expanded, and more than 300 new photographs have been added. The second edition covers new beneficial organisms and pest profiles, and it includes a new chapter on the practical aspects and application of biological control. It also contains a new final chapter that puts biological control in perspective, discussing interactions that occur when using biocontrol for population management as well as some of the possible mechanisms of biocontrol.

### Editorial Review

Review

#### *Praise For the Previous Edition:*

...high quality photographs and accurate information... a practical guide for gardeners and a textbook for students studying applied entomology... will also be appreciated by naturalists.

*?European Journal of Entomology*

From the Back Cover

Now reissued in softcover, this book is designed to help the reader anticipate and recognize specific problems of pest management and then resolve them using the natural enemies of pests -- insects, mites and diseases. An introductory section describes the impact on predator/prey relationships and the population dynamics of host species environments for arable, orchard and protected plants. The main sections on pest profiles, beneficial species and entomopathogens provide a pest identification guide and concise text dealing with species characteristics, life cycle, damage symptoms, plant/pest association and influence on growing practices. Packed with over 300 color photographs of the highest quality, this handbook will be a valuable reference guide for professional, academic and lay readers, including growers, farmers, consultants, scientists and students.

About the Author

**Neil Helyer** joined the Glasshouse Crops Research Institute as an entomologist in 1976. He joined Fargro Ltd. as their Integrated Pest Management Specialist in 1995. Currently, Neil visits horticulturalists to develop and monitor IPM programs, the majority of which are specifically designed for each site and crop. These include protected salad crops, soft fruit, ornamentals, and hardy nursery stock, as well as botanic gardens (RBG Kew, RHS Wisley, etc.) and interior plant landscapes. Neil holds a BASIS certificate and ensures that his technical information base is kept up to date by being a member of the BASIS Professional Register.

**Nigel Cattlin** joined ICI's Plant Protection Division at Jealott's Hill Research Station in 1963. He later formed and led its photographic unit, carrying out research projects with high-speed, time-lapse, and aerial photography. In 1981 Nigel established Holt Studios, an independent company providing a specialist photographic service to the agricultural industry, government organizations, and publishers. This resource is widely used for text and reference books, trade and consumer magazines, and advertising. Holt Studios' main business was transferred to another agency in 2005, but Nigel continues to take photographs in his specialized fields of interest.

**Dr. Kevin Brown** joined the Sittingbourne Laboratory of Shell Research Ltd. in 1986 as an ecotoxicologist. He was a founding member of the Beneficial Arthropod Testing Group (BART) in 1988 and is an author of many of the current regulatory ring-tested methods for nontarget arthropods. In 1989 he established Ecotox Limited, a contract testing facility. He now works as an independent ecotoxicologist and environmental consultant conducting and refining risk assessments, monitoring higher tier studies on behalf of clients, and participating in multifacility research projects.

## **Users Review**

### **From reader reviews:**

#### **Eleanor Sotomayor:**

Book is actually written, printed, or highlighted for everything. You can recognize everything you want by a reserve. Book has a different type. As you may know that book is important point to bring us around the world. Adjacent to that you can your reading skill was fluently. A publication Biological Control in Plant Protection: A Colour Handbook, Second Edition will make you to end up being smarter. You can feel much more confidence if you can know about anything. But some of you think that will open or reading the book make you bored. It's not make you fun. Why they can be thought like that? Have you searching for best book or acceptable book with you?

#### **Geneva Milbourn:**

Hey guys, do you desires to finds a new book to read? May be the book with the subject Biological Control in Plant Protection: A Colour Handbook, Second Edition suitable to you? The particular book was written by well known writer in this era. The book untitled Biological Control in Plant Protection: A Colour Handbook, Second Edition is the one of several books that will everyone read now. This book was inspired lots of people in the world. When you read this e-book you will enter the new way of measuring that you ever know previous to. The author explained their thought in the simple way, so all of people can easily to recognise the core of this guide. This book will give you a lots of information about this world now. So you can see the represented of the world with this book.

#### **Angelica Adams:**

Reading a guide can be one of a lot of task that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new details. When you read a guide you will get new information simply because book is one of a number of ways to share the information or maybe their idea. Second, looking at a book will make you actually more imaginative. When you studying a book especially fictional book the author will bring that you imagine the story how the people do it anything. Third, you could share your knowledge to other individuals. When you read this Biological Control in Plant Protection: A Colour Handbook, Second Edition, you can tells your family, friends and soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a book.

#### **Mitchell Wilder:**

Reading a reserve tends to be new life style on this era globalization. With studying you can get a lot of information that could give you benefit in your life. Using book everyone in this world may share their idea. Books can also inspire a lot of people. Lots of author can inspire all their reader with their story as well as their experience. Not only the story that share in the publications. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on earth always try to improve their proficiency in writing,

they also doing some analysis before they write to the book. One of them is this Biological Control in Plant Protection: A Colour Handbook, Second Edition.
