Design Structure Matrix Methods and Applications (Engineering Systems)

By Steven D. Eppinger, Tyson R. Browning

Design structure matrix (DSM) is a straightforward and flexible modeling technique that can be used for designing, developing, and managing complex systems. DSM offers network modeling tools that represent the elements of a system and their interactions, thereby highlighting the system's architecture (or designed structure). Its advantages include compact format, visual nature, intuitive representation, powerful analytical capacity, and flexibility. Used primarily so far in the area of engineering management, DSM is increasingly being applied to complex issues in health care management, financial systems, public policy, natural sciences, and social systems. This book offers a clear and concise explanation of DSM methods for practitioners and researchers.

Editorial Review

Review

Steven Eppinger and Tyson Browning have synthesized more than two decades of research into an amazing resource for designers and managers of complex systems. The book lays a foundation with a clear and concise tutorial of the Design Structure Matrix method. The authors then bring the tool to life with applications as diverse as software, aircraft engines, and facilities design.

(Karl Ulrich, Vice Dean of Innovation, CIBC Professor of Entrepreneurship and e-Commerce, The Wharton School, University of Pennsylvania)

At last, there is *one* book on the design structure matrix method and its applications that addresses the entire spectrum of product architecture, organization design, and process optimization. The rich, real world examples are based on years of research and are excellent resources for mastering the DSM method. Every engineering leader will benefit from the concepts in this book.

(Xinqun Qui, John Deere Power Systems)

As an industrial practitioner of DSM methods since 1995, I have seen how powerful these models can be for visualization and management of complex engineering challenges. Steven Eppinger and Tyson Browning have compiled more than twenty years of DSM experience to create the definitive body of DSM knowledge. I strongly recommend this book.

(H. Mike Stowe, Senior Process Engineer, The Boeing Company; Leader, DSM Industry Special Interest Group (SIG))

About the Author

Steven D. Eppinger is Professor of Management Science and Innovation at MIT Sloan School. He holds the General Motors Leader for Global Operations Chair and has a joint appointment in MIT's Engineering Systems Division. He is Codirector of MIT's System Design and Management Program. Tyson R. Browning is Associate Professor of Operations Management at the Neeley School of Business at Texas Christian University. His background in systems engineering and project management includes a Ph.D. from MIT.

Users Review

From reader reviews:

Barbara Clarke:

Have you spare time for just a day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the particular Mall. How about open as well as read a book eligible Design Structure Matrix Methods and Applications (Engineering Systems)? Maybe it is to be best activity

for you. You know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with its opinion or you have various other opinion?

Jules Thompson:

Here thing why this specific Design Structure Matrix Methods and Applications (Engineering Systems) are different and reputable to be yours. First of all studying a book is good however it depends in the content of computer which is the content is as tasty as food or not. Design Structure Matrix Methods and Applications (Engineering Systems) giving you information deeper and different ways, you can find any guide out there but there is no guide that similar with Design Structure Matrix Methods and Applications (Engineering Systems). It gives you thrill looking at journey, its open up your own personal eyes about the thing that happened in the world which is might be can be happened around you. You can actually bring everywhere like in area, café, or even in your way home by train. If you are having difficulties in bringing the published book maybe the form of Design Structure Matrix Methods and Applications (Engineering Systems) in e-book can be your alternative.

Bernice King:

The ability that you get from Design Structure Matrix Methods and Applications (Engineering Systems) is the more deep you rooting the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to understand but Design Structure Matrix Methods and Applications (Engineering Systems) giving you buzz feeling of reading. The writer conveys their point in a number of way that can be understood simply by anyone who read this because the author of this book is well-known enough. That book also makes your own vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having this kind of Design Structure Matrix Methods and Applications (Engineering Systems) instantly.

Jeff Brown:

The guide with title Design Structure Matrix Methods and Applications (Engineering Systems) has a lot of information that you can find out it. You can get a lot of gain after read this book. This particular book exist new understanding the information that exist in this book represented the condition of the world at this point. That is important to yo7u to be aware of how the improvement of the world. This specific book will bring you inside new era of the glowbal growth. You can read the e-book on your smart phone, so you can read the item anywhere you want.
