Security Risk Assessment: Managing Physical and Operational Security By John M. White

Security Risk Assessment is the most up-to-date and comprehensive resource available on how to conduct a thorough security assessment for any organization.

A good security assessment is a fact-finding process that determines an organization's state of security protection. It exposes vulnerabilities, determines the potential for losses, and devises a plan to address these security concerns. While most security professionals have heard of a security assessment, many do not know how to conduct one, how it's used, or how to evaluate what they have found.

Security Risk Assessment offers security professionals step-by-step guidance for conducting a complete risk assessment. It provides a template draw from, giving security professionals the tools needed to conduct an assessment using the most current approaches, theories, and best practices.

- Discusses practical and proven techniques for effectively conducting security assessments
- Includes interview guides, checklists, and sample reports
- Accessibly written for security professionals with different levels of experience conducting security assessments

Editorial Review

Review

"White has created an excellent book with material drawn from the well of his experience...clearly a must-read for the inexperienced or nonsecurity professional who is faced with the task of conducting a security assessment." --**ASIS Dynamics**

"...it was refreshing to see this book covered very little on IT and took a broader view of security risk assessment...Each section is presented in layman's terms, with clear examples and some templates to help with the assessment. Score: 7 out of 10" --**BCS.org, January 2015**

"...takes you through a security risk assessment, from who will do it, how often it needs doing, and how long it takes...through the planning, the schedule and budget, and that wonderful word 'deliverables', how to gather information on risk, whether from staff surveys or interviews." --**Professional Security Magazine Online, 2014**

About the Author

John M. White, a recognized expert in asset protection management, has over 38 years of experience including military, law enforcement, corporate security administration, and professional security consultation.

White is Board Certified in Security Management as a Certified Protection Professional (CPP), and he is a Certified Healthcare Protection Administrator (CHPA), the two highest certifications in the security profession.
