The Neuro-ophthalmology Survival Guide, 1e By Anthony Pane MBBS MMedSc FRANZCO PhD, Neil R. Miller MD FACS, Mike Burdon BSc MB BS MRCP FRCOphth

A practical, symptom-orientated handbook of neuro-ophthalmology for all trainee and practising ophthalmologists.

- Practical and accessible handbook for the ophthalmologist without a specialist interest in neuro-ophthalmology and acquired strabismus.
- Simplifies a subject which is often a cause of litigation against practising ophthalmologists and exam failure for trainees and residents.
- Aids diagnosis in a field in which mistakes may lead to medico-legal problems, eg brain tumours presenting with blurred or double vision.
- Symptom-orientated - guides the reader from the presenting symptom to diagnosis and treatment or referral, through a series of easy to follow flowcharts.
- Chapter One presents 20 "golden rules" to keep you and your patients out of trouble

Editorial Review

Review

"This book is unique in that it is organized according to symptoms. The text for each symptom includes an introduction, examination checklist, management flowchart, diagnostic criteria, differential diagnosis, and guide to appropriate referral...Chapters include many beautiful illustrations such as examples of radiological studies, color fundus photographs, and visual field charts. Management flow charts are easy to read and understand...Throughout medical school and resident training in all of the specialties and subspecialties, there seems to be an endless search for the book or manual that covers everything one needs to know about a subject, but will still fit in a large pocket. For neuro-ophthalmology, this is that book."

Survey of Ophthalmology

Volume 52, Issue 5, September-October 2007, Pages 554-555

"This is an excellent, clinically relevant book essential to any physician who evaluates patients with potential neuro-ophthalmologic problems."

Journal of Neuro-ophthalmology vol 28 no. 1 March 2008, by Dr Karl Golnik (University of Cincinnati)

A practical, symptom-based guide to diagnosing and treating a wide range of neuro-ophthalmology conditions. It is extremely useful for orthoptists and other specialists interested in this field. The layout of the book is user-friendly covering a variety of symptoms that patients may present with. The Neuro-Ophthalmology Survival Guide is an excellent clinical guide for ophthalmologists, orthoptists and undergraduate orthoptic students. A worthwhile addition to an orthoptic department library.

British & Irish Orthoptic Journal, 2009

Users Review

From reader reviews:

Trey Olivas:

Book is to be different for each grade. Book for children till adult are different content. We all know that that book is very important normally. The book The Neuro-ophthalmology Survival Guide, 1e ended up being making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The reserve The Neuro-ophthalmology Survival Guide, 1e is not only giving you considerably more new information but also to get your friend when you feel bored. You can spend your own personal spend time to read your reserve. Try to make relationship together with the book The Neuro-ophthalmology Survival Guide, 1e. You never experience lose out for everything should you read some books.

Frank Johnson:

Many people spending their time by playing outside together with friends, fun activity together with family

or just watching TV 24 hours a day. You can have new activity to invest your whole day by studying a book. Ugh, ya think reading a book can actually hard because you have to use the book everywhere?
