### Who Built the Moon? By Christopher Knight, Alan Butler

The authors of *Civilization One* return, bringing new evidence about the Moon that will shake up our world. Christopher Knight and Alan Butler realized that the ancient system of geometry they presented in their earlier, breakthrough study works as perfectly for the Moon as it does the Earth. They found a consistent sequence of integer numbers that they can apply to every major aspect of the Moon; no such pattern emerges for any other planet or moon in the solar system. In addition, Knight and Butler discovered that the Moon possesses few or no heavy metals and has no core—something that should not be possible. Their persuasive conclusion: if higher life only developed on Earth because the Moon is exactly *what* it is and *where* it is, it becomes unreasonable to cling to the idea that the Moon is a natural object—an idea with profound implications.

## **Editorial Review**

### About the Author

Christopher Knight has written five very successful books. His first book, *The Hiram Key*, co-authored with Robert Lomas, was published in 1996 and it immediately went into the UK top ten, bestseller list and remained there for 8 consecutive weeks. It has since been translated into 37 languages and sold over a million copies worldwide, becoming a bestseller in several countries. Alan Butler, a qualified engineer, but always fascinated by history made himself into something of an expert in astrology and astronomy. He has published four successful books on the Knights Templar and the Grail legend. He is also a published playwright and a very successful radio dramatist. They are co-authors of the best selling *Civilization One*.

## **Users Review**

### **From reader reviews:**

#### **Archie Williams:**
