## Field Notes from a Catastrophe: Man, Nature, and Climate Change By Elizabeth Kolbert

Elizabeth Kolbert's environmental classic *Field Notes from a Catastrophe* first developed out of a groundbreaking, National Magazine Award-winning three-part series in *The New Yorker*. She expanded it into a still-concise yet richly researched and damning book about climate change: a primer on the greatest challenge facing the world today.

But in the years since, the story has continued to develop; the situation has become more dire, even as our understanding grows. Now, Kolbert returns to the defining book of her career. She'll add a chapter bringing things up-to-date on the existing text, plus she'll add three new chapters--on ocean acidification, the tar sands, and a Danish town that's gone carbon neutral--making it, again, a must-read for our moment.
