Health Education: Critical perspectives (Routledge Research in Education Policy and Politics) From Routledge

Health Education: Critical perspectives provides a socio-cultural and critical approach to health education. The book draws together international experts in the fields of health and education who deconstruct contemporary discourses and practices, and re-imagine a health education that both connects with young people and offers a way forward in addressing issues of health and wellbeing.

Chapters within specifically link academic work on neoliberalism, healthism, risk and the body to wider discourses of health and health education. They challenge current practices and call for a re-thinking of current health programs in education settings. A unique feature of this book is the analyses of health education from both political and applied levels across a range of international contexts.

The book is divided into three sections:

- the social and political contexts informing health education
- how individual health issues (sexuality, alcohol, mental health, the body and obesity, nutrition) articulate in education in complex ways
- alternative ways to think about health and health education pedagogy.

The overall theme of the book offers a perspective that the current approach to health education – promoting a fear of ill health, self-surveillance and individual responsibility – can become a form of health fascism, and we need to be cognisant of this potential and its consequences for young people. The book will be of key interest to academics and researchers exploring the political context of health education.

Editorial Review

About the Author

Katie Fitzpatrick is a Senior Lecturer in Health and Physical Education in the Faculty of Education at the University of Auckland, New Zealand. She has published in the areas of multicultural education, research methodology and health and physical education, as well as previously being an experienced high school teacher and national policy developer.

Richard Tinning is Professor of Physical Education in the Faculty of Education at the University of Auckland, New Zealand, and Professor of Pedagogy and Physical Education in the School of Human Movement Studies at the University of Queensland, Australia. Richard was one of the early advocates of critical pedagogy within physical education and has written extensively on teacher education for HPE and the relationship between physical education and health education.

Users Review

From reader reviews:

Jake Leslie:

Harry Barnes:

In this era globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher that print many kinds of book. The actual book that recommended for your requirements is Health Education: Critical perspectives (Routledge Research in Education Policy and Politics) this guide consist a lot of the information of the condition of this world now. That book was represented how can the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The writer made some study when he makes this book. That is why this book suitable all of you.

Alexandra Stafford:

As a scholar exactly feel bored in order to reading. If their teacher requested them to go to the library or even make summary for some reserve, they are complained. Just minor students that has reading's heart or real their passion. They just do what the trainer want, like asked to the library. They go to there but nothing reading critically. Any students feel that reading is not important, boring and can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Health Education: Critical perspectives (Routledge Research in Education Policy and Politics) can make you feel more interested to read.
