**When the Scientist Presents: An Audio and Video Guide to Science Talks** By Jean-luc Lebrun

This book looks at the presenting scientist from a novel angle: the presenter-host. When scientists give a talk, the audience ('guests') expects the title of the talk to determine presentation content, they require understandable slides, and they demand visible and audible scientific authority. To each expectation corresponds a set of skills: personal (voice, host qualities, time control), technical (presentation tools and slide design), and scientific (Q&A, slide content). The author takes an original human factor view of the presentation delivery, in which the audience is easily distracted, rapidly forgetful, and increasingly impatient. Thus, insightful pointers are given on how to deliver the talk, how to craft the slides, and how to prevent the computer from rendering the presenting host-scientist into a 'ghost'. In addition, the book goes in-depth over the treatment of questions by examining the motives and style of the questioners, and advising on how best to answer to each type of questioner. The book comes with a DVD for audio and video examples, and includes essential PowerPoint and Keynote techniques that a presenter cannot live without.

### **Editorial Review**

#### **Review**

In this masterful and enlightening contribution, Lebrun builds on his reader and writer's guide to 'Scientific Writing' to expose the essential ingredients of effective scientific presentations. Fresh and entertaining, full of practical advice and highly readable, this is a most instructive and enjoyable work. Postgraduate students, supervisors and -- Alastair Curry "Royal University of Phnom Penh, Cambodia &, Formerly Senior Lecturer, University of Hertfordshire, UK"

#### **From the Inside Flap**

This book looks at the presenting scientist from a novel angle: the presenter-host. When scientists give a talk, the audience ("guests") expects the title of the talk to determine presentation content, they require understandable slides, and they demand visible and audible scientific authority. To each expectation corresponds a set of skills: personal (voice, host qualities, time control), technical (presentation tools and slide design), and scientific (Q&A, slide content).

The author takes an original human factor view of the presentation delivery, in which the audience is easily distracted, rapidly forgetful, and increasingly impatient. Thus, insightful pointers are given on how to deliver the talk, how to craft the slides, and how to prevent the computer from rendering the presenting host-scientist into a "ghost." In addition, the book goes in-depth over the treatment of questions by examining the motives and style of the questioners, and advising on how best to answer to each type of questioner.

The book comes with a DVD for audio and video examples, and includes essential PowerPoint and Keynote techniques that a presenter cannot live without.

### **Users Review**

#### **From reader reviews:**

##### **Joseph Vargas:**

Book is written, printed, or created for everything. You can know everything you want by a book. Book has a different type. To be sure that book is important thing to bring us around the world.
