Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications)

By Michiel Hazewinkel, Nadiya Gubareni, V.V. Kirichenko

This second volume of this text covers the classical aspects of the theory of groups and their representations. It also offers a general introduction to the modern theory of representations including the representations of quivers and finite partially ordered sets and their applications to finite dimensional algebras. It reviews key recent developments in the theory of special ring classes including Frobenius, quasi-Frobenius, and others.

Editorial Review

Review

From the reviews:

"This is the first of two volumes which aim to take the theory of associative rings and their modules from fundamental definitions to the research frontier. The book is written at a level intended to be accessible to students who have taken standard basic undergraduate courses in linear algebra and abstract algebra. ... has been written with considerable attention to accuracy, and has been proofread with care. ... A very welcome feature is the substantial set of bibliographic and historical notes at the end of each chapter." (Kenneth A. Brown, *Mathematical Reviews*, 2006a)

"The authors concentrate on the representation theory (of groups, algebras, posets ...) and on the structure of some special rings. ... The book is written on a level accessible to advanced students who have some experience with algebra. ... Interesting historical comments and references close each chapter. A list of references for further reading is providing at the end of the book." (Stanislaw Kasjan, *Mathematical Reviews*, Issue 2009 b)

Users Review

From reader reviews:

James McNally:

Information is provisions for folks to get better life, information today can get by anyone at everywhere. The information can be a expertise or any news even an issue. What people must be consider whenever those information which is inside former life are difficult to be find than now's taking seriously which one is suitable to believe or which one the resource are convinced. If you have the unstable resource then you have it as your main information it will have huge disadvantage for you. All of those possibilities will not happen inside you if you take *Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications)* as your daily resource information.

Elizabeth Givens:

Are you kind of hectic person, only have 10 or even 15 minute in your moment to upgrading your mind skill or thinking skill actually analytical thinking? Then you are having problem with the book as compared to can satisfy your short time to read it because this time you only find reserve that need more time to be learn. *Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications)* can be your answer because it can be read by a person who have those short extra time problems.

Emily Scott:

Is it you who having spare time and then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications) can be the response, oh how comes? It's a book you know. You are so out of date, spending your extra time by reading in this new era is common not a geek activity. So what these guides have than the others?

Frances McKay:

Do you like reading a e-book? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many query for the book? But just about any people feel that they enjoy regarding reading. Some people likes examining, not only science book but also novel and Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications) or perhaps others sources were given understanding for you. After you know how the truly amazing a book, you feel wish to read more and more. Science e-book was created for teacher or perhaps students especially. Those publications are helping them to bring their knowledge. In additional case, beside science book, any other book likes Algebras, Rings and Modules: Volume 2 (Mathematics and Its Applications) to make your spare time considerably more colorful. Many types of book like this one.
