Twelfth Planet: Book I of the Earth Chronicles (The Earth Chronicles) By Zecharia Sitchin

Over the years, startling evidence has been uncovered, challenging established notions of the origins of life on Earth—evidence that suggests the existence of an advanced group of extraterrestrials who once inhabited our world.

The first book of the revolutionary *Earth Chronicles* series offers indisputable documentary evidence of the existence of the mysterious planet Nibiru and tells why its astronauts came to Earth eons ago to fashion mankind in their image.

The product of more than thirty years of meticulous research, *The 12th Planet* treats as fact, not myth, the tales of Creation, the Deluge, the Tower of Babel, and the Nefilim who married the daughters of man. By weaving together the biblical narrative with Sumerian and Babylonian clay-tablet texts, it challenges the established notions of the origins of Earth and mankind, and offers a compelling alternative history and prehistory of both.

Amazon.com Review

Zecharia Sitchin's *The 12th Planet* is the starting point on a quest that spans six books and 20 years worth of ancient aliens, genetic manipulation, and scrutiny of linguistic minutiae. If we trust Sitchin's translation abilities, we must be prepared for the imminent return of an alien race who created us some 300,000 years ago. *The 12th Planet* is perhaps the best written of Sitchin's *Earth Chronicles* series; full of example after example of ancient Sumerian passages, astronomical observations, archaeological finds, and technological coincidences supporting his theories. The price we pay for all this evidence is a bit of a dry read at times, but the ideas Sitchin proposes are more than scintillating enough to make up for the overtly scholastic tone of his text. --*Brian Patterson*

Review

"Exciting...credible...A radical new theory..Provocative and compelling." (Library Journal)

"One of the most important books on Earth's roots ever written." (East-West Magazine)

"Heavyweight scholarship...Now a recognized scholar has come forth with a theory that is the most astonishing of all." (United Press International)

From the Inside Flap

Dear Reader,

The Earth Chronicles series is based on the premise that mythology is the depository of ancient recollections, that the Bible should be read literally as a historic-scientific document, and that ancient civilizations were the product of knowledge brought to Earth by the Anunnaki-- "Those who from Heaven to Earth came."

Complementing each other and serving to bring the saga of gods and humans on Earth ever closer to our time, each book of the series looks at this awesome tale from a different perspective.

The 12th Planet, the first book of the series, brings to life the Sumerian civilization and presents millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and the landings of the Anunnaki on Earth every 3,600 years.

The Stairway to Heaven, the second book, incorporates ancient Egyptian evidence to show that the gateway between the mortal and the divine was a spaceport in the Sinai Peninsula, with the Giza pyramids and the Sphinx serving as beacons for the landings.

The Wars of Gods and Men, the third book, additionally embraces Canaanite, Hittite, and Hindu sources to include in these investigations the incidents of the Tower of Babel and the upheaval of Sodom and Gomorrah, concluding that nuclear weapons were used on Earth 4,000 years ago.

The Lost Realms, the fourth book, transports readers to the pre-Columbian civilizations and ancient empires of the Americas, revealing hitherto unrecognized golden links between ancient Near Eastern civilizations and the "cities of the gods" of the Olmecs, Mayas, Aztecs, and Incas.

When Time Began, the fifth book, explores ancient knowledge of Heaven and Earth and the interwoven cycles that gave rise to astronomy, the zodiac and astrology, and stone calendars such as Stonehenge, revealing the secret of New Ages past and future.

And *The Cosmic Code*, the sixth book in the series, explains how the secrets of humankind's celestial teachers were encoded in the Bible and other sacred and hidden "books"--a cosmic code that links Earthlings to their cosmic roots. In the years since each book was published, new scientific discoveries have provided mounting corroboration of the series' incredible and unorthodox science-based conclusions. This accumulation of discoveries and the origins of humankind and the solar system are further discussed in the companion books *Genesis Revisited* and *Divine Encounters*. I trust that modern science will continue to confirm ancient knowledge.

Zecharia Sitchin was born in Russia and grew up in Palestine, where he acquired a profound knowledge of modern and ancient Hebrew, other Semitic and European languages, the Old Testament, and the history and archaeology of the Near East. A graduate of the University of London with a degree in economic history, he worked as a journalist and editor for many years prior to undertaking his life's work--*The Earth Chronicles*.

One of the few scholars able to read the clay tablets and interpret ancient Sumerian and Akkadian, Sitchin based *The Earth Chronicles* series on the texts and pictorial evidence recorded by the ancient civilizations of the Near East. His books have been widely translated, reprinted in paperback editions, converted to Braille for the blind, and featured on radio and television programs.
