College Algebra with Trigonometry (Barnett, Ziegler & Byleen's Precalculus Series) By Raymond Barnett, Michael Ziegler, Karl Byleen, David Sobecki

Barnett, Ziegler, Byleen, and Sobecki's College Algebra with Trigonometry text is designed to be user friendly and to maximize student comprehension by emphasizing computational skills, ideas, and problem solving as opposed to mathematical theory. The large number of pedagogical devices employed in this text will guide a student through the course. Integrated throughout the text, students and instructors will find Explore-Discuss boxes which encourage students to think critically about mathematical concepts. In each section, the worked examples are followed by matched problems that reinforce the concept being taught. In addition, the text contains an abundance of exercises and applications that will convince students that math is useful. A MathZone site featuring algorithmic exercises, videos, and other resources accompanies the text.

Editorial Review

About the Author

I was born and raised in Cleveland, and started college at Bowling Green State University in 1984 majoring in creative writing. Eleven years later, I walked across the graduation stage to receive a PhD in math, a strange journey indeed. After two years at Franklin and Marshall College in Pennsylvania, I came home to Ohio, accepting a tenure-track job at the Hamilton campus of Miami University. I've won a number of teaching awards in my career, and while maintaining an active teaching schedule, I now spend an inordinate amount of time writing textbooks and course materials. I've written or co-authored either seven or twelve textbooks, depending on how you count them, as well as several solutions manuals and interactive CD-ROMS. After many years as developmental math coordinator at Miami Hamilton, I share the frustration that goes along with low pass rates in the developmental math curriculum. Far too many students end up on the classic Jetson's-style treadmill, with the abstract nature of the traditional algebra curriculum keeping them from reaching their goals. Like so many instructors across the country, I believe the time is right to move beyond the one-size-fits-all curriculum that treats students the same whether they hope to be an engineer or a pastry chef. "Because we've always done it that way" is NOT a good reason to maintain the status quo in our curriculum. Let's work together to devise alternate pathways that help students to learn more and learn better while hastening their trip into credit-bearing math courses. Since my book (Math in Our World) is written for the Liberal Arts Math and Quantitative Literacy market, I think I'm in the right place at the right time to make a difference in the new and exciting pathways course. I'm in a very happy place right now: my love of teaching meshes perfectly with my childhood dream of writing. (Don't tell my publisher this – they think I spend 20 hours a day working on textbooks – but I'm working on my first novel in the limited spare time that I have.) I'm also a former coordinator of Ohio Project NExT, as I believe very strongly in helping young college instructors focus on high-quality teaching as a primary career goal. I live in Fairfield, Ohio with my lovely wife Cat and fuzzy dogs Macleod and Tessa. When not teaching or writing, my passions include Ohio State football, Cleveland Indians baseball, heavy metal music, travel, golf, and home improvement.

Users Review

From reader reviews:

John Reed:

Have you spare time for any day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a walk, shopping, or went to the Mall. How about open or perhaps read a book eligible College Algebra with Trigonometry (Barnett, Ziegler & Byleen's Precalculus Series)? Maybe it is to get best activity for you. You know beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with the opinion or you have different opinion?

Lisa Maurer:

As people who live in the particular modest era should be change about what going on or info even knowledge to make all of them keep up with the era that is certainly always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice to suit your needs but the

problems coming to anyone is you don't know which you should start with. This College Algebra with Trigonometry (Barnett, Ziegler & Byleen's Precalculus Series) is our recommendation to help you keep up with the world. Why, because this book serves what you want and want in this era.

Matthew Hood:

The guide untitled College Algebra with Trigonometry (Barnett, Ziegler & Byleen's Precalculus Series) is the publication that recommended to you to read. You can see the quality of the publication content that will be shown to you actually. The language that article author use to explained their way of doing something is easily to understand. The article author was did a lot of study when write the book, and so the information that they share to you is absolutely accurate. You also could possibly get the e-book of College Algebra with Trigonometry (Barnett, Ziegler & Byleen's Precalculus Series) from the publisher to make you much more enjoy free time.

Tammy Jones:

Spent a free the perfect time to be fun activity to do! A lot of people spent their sparetime with their family, or their very own friends. Usually they performing activity like watching television, likely to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your free time/ holiday? Could be reading a book may be option to fill your free time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to try out look for book, may be the guide untitled College Algebra with Trigonometry (Barnett, Ziegler & Byleen's Precalculus Series) can be fine book to read. May be it may be best activity to you.
