Nutrition, Health, and Safety for Young Children: Promoting Wellness By Joanne Sorte, Inge Daeschel, Carolina Amador

This book provides students with a comprehensive understanding of the nutrition, health, and safety needs of young children from birth through 8 years of age. The book is designed to give future teachers practical, applied, easy-to-understand information that will prepare them to serve young children in the family child care, childcare center, preschool and early primary school setting. Students will find the case scenarios woven throughout the chapters engaging and an effective means to transfer the learning of concepts to real life settings. This transfer of learning is reinforced by web video clips available at the MyEducationlab website that bring what students read and learn to life.

The text demonstrates how a strong curriculum at any age or stage of early childhood, birth through age 8, allows teachers to teach and model healthy practices with regard to nutrition, health, and safety. The authors' accessible and engaging writing style bring the reader into the classroom by weaving in classroom scenarios. In addition, chapter features entitled "Nutrition Notes," "Safety Segments," "Policy Points," and "Health Hints" provide students with information on current topics of interest and controversy while "What ifs.." feature boxes promote critical thinking skills to make decisions about topics they might encounter in the early childhood setting.

Presents integrated curriculum for teaching nutrition, health and wellness; promotes current evidence-based practices; aligns with National Health Education standards; accessible writing style brings readers into the classroom; promotes culturally responsive teaching.

Addresses the obesity epidemic, promoting sustainability, health curriculum, accommodating the nutrition, health and safety needs of all children; building relationships with families

Two-year health, safety, and nutrition courses.

About the Author

Joanne Sorte has been an early childhood professional for over 30 years. She earned her Bachelor of Arts in Child Development & Family Life, and her Master of Science in Human Development & Family Sciences at Oregon State University. She and began her early childhood professional experiences as a home visitor for the Home Base program in Yakima, Washington. She then directed the Afternoon Preschool Program for Lower Columbia College in Longview, Washington and worked as the Family Services Coordinator for Head Start. These experiences inspired her commitment to serving families from diverse backgrounds, while raising three children with her husband, provided her many opportunities to experience the joys of child development and parenting. She taught in preschool settings for several years, until accepting a position on the faculty of Human Development & Family Sciences at OSU as Director of the Hallie Ford Child Development Laboratory. She is also director of the OSU Oregon Head Start Prekindergarten Program and an active member of the Oregon Head Start Association. Recognizing the value of the laboratory preschool as a formative experience for children, families and students, she guided the evolution of a blended early education program model where children from low income families, children with special needs, and children from the general community attend preschool together in the early education laboratory. She directs the practicum experience for students in Early Childhood Development & Education, supervises graduate students and facilitates research on child development and wellness. She has coauthored an intervention program with Inge Daeschel, called *Health in Action: 5 Steps to Good Health*. She enjoys advocating for education and being active with her family.

Inge Daeschel is licensed and registered dietitian who is Board Certified as a specialist in pediatric nutrition. She received her Bachelor of Science degree in Foods and Nutrition Science at Plattsburgh State University in New York. She completed her dietetic internship at Massachusetts General Hospital in Boston and

received her Masters of Science in Nutrition Science from the University of Tennessee at Knoxville. She worked at Duke University Medical Center, first as Pediatric Dietitian Clinician and later as Assistant Chief Clinical Dietitian. This position was instrumental in her interest in helping families understand the nutritional needs of their children.

She and her family relocated to Oregon where she worked at the Corvallis Clinic and later accepted a faculty position as instructor in the department of Human Development & Family Sciences at OSU where she is Health and Nutrition Services Coordinator of the Hallie Ford Child Development Laboratory and OSU Oregon Head Start Prekindergarten Program. She is also a nutrition consultant providing services to an area hospital, two WIC programs, a Head Start and Migrant Head Start program. Her expertise in feeding children is based on personal as well as professional experience, gained raising 4 children, including one with multiple food allergies. She has coauthored with Joanne Sorte an intervention program called *Health in Action: 5 Steps to Good Health* which promotes wellness by providing focused messages that address nutrition and physical activity in early childhood programs.

Carolina Amador, M.D., is a Board Certified Pediatrician. She received a Bachelor's of Education in Speech Pathology at University of Georgia in Athens, Georgia. She earned her Medical Degree from the Medical College of Georgia in Augusta, Georgia and completed her residency in Pediatrics at West Virginia University in Morgantown, West Virginia. She worked as Chief Resident in Pediatrics at West Virginia University where she developed a lactation clinic as well as a focus on advocacy for breastfeeding mothers. She is in the process of obtaining a Master's in Public Health from University of Washington with a focus on Maternal and Child Health. She moved with her husband to Corvallis, Oregon and has worked as a general Pediatrician for 7 years and is currently employed by a Community Health Center which serves a large percentage of Hispanics and migrant workers. During these years as a General Pediatrician, she has developed professional interests in childhood obesity prevention, health disparities, and latino health. She has been involved in community events and organizations advocating for children's health including the Oregon State University Head Start Health Advisory Committee, the Benton County Healthy Weight and Lifestyle Coalition, Benton County Oral Health Coalition, and the Breastfeeding Coalition of Benton County. Throughout her years of education and medical practice, she has participating in several international health experiences in Ecuador, Honduras, Uganda, and Malawi.

Users Review

From reader reviews:

Randall Barbee:

Reading a publication tends to be new life style in this era globalization. With examining you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story or their experience. Not only the storyline that share in the guides. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors on earth always try to improve their talent in writing, they also doing some study before they write for their book. One of them is this Nutrition, Health, and Safety for Young Children: Promoting Wellness.

Teresa Riggs:

Reading can called imagination hangout, why? Because if you find yourself reading a book specially book

entitled Nutrition, Health, and Safety for Young Children: Promoting Wellness your brain will drift away through every dimension, wandering in every single aspect that maybe not known for but surely might be your mind friends. Imaging every single word written in a book then become one type conclusion and explanation in which maybe you never get before. The Nutrition, Health, and Safety for Young Children: Promoting Wellness giving you another experience more than blown away your mind but also giving you useful facts for your better life on this era. So now let us teach you the relaxing pattern the following is your body and mind is going to be pleased when you are finished reading it, like winning a. Do you want to try this extraordinary wasting spare time activity?

John Kirk:

It is possible to spend your free time to read this book this book. This Nutrition, Health, and Safety for Young Children: Promoting Wellness is simple to create you can read it in the recreation area, in the beach, train in addition to soon. If you did not get much space to bring often the printed book, you can buy the e-book. It is make you much easier to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Constance Argueta:

As a pupil exactly feel bored for you to reading. If their teacher expected them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Nutrition, Health, and Safety for Young Children: Promoting Wellness can make you experience more interested to read.
