Zooarchaeology and Field Ecology: A Photographic Atlas By Jack M Broughton, Shawn D. Miller

This photographic atlas, developed over twenty years of teaching in the field, expedites the work of the zooarchaeologist by integrating both osteology and wildlife ecology into a single volume. Zooarchaeology, the study of animal remains found at archaeological sites, is interdisciplinary in nature, requiring students and researchers to not only master the technical skills of identifying fragmentary bones and teeth but also to develop a deep understanding of the taxonomy, natural history, behavior, and ecology of the species identified. Until now, these topics have always been treated separately. This book is the only field guide and laboratory manual to combine animal ecology and natural history with the detailed osteology of all the vertebrate classes (fishes, amphibians, birds, and mammals) and all the primary orders native to western North America. Skeletal images are shown at a variety of magnifications and views and are accompanied by photographs of the animals in their characteristic habitats.

Editorial Review

Review

“Contains a wealth of information useful to vertebrate paleozoologists and also to forensic wildlife biologists. A rigorously scientific treatment. The book is superb; the photographs are excellent.”

—R. Lee Lyman, Chair, Department of Anthropology, University of Missouri–Columbia

“No other book (or website for that matter) treats all the vertebrates from western North America in such a comprehensive fashion. This book fills an important niche.”

—Virginia L. Butler, Professor, Department of Anthropology, Portland State University

“A very useful and welcome addition to the arsenal of tools available to zooarchaeologists....This is unarguably an excellent volume that will make a positive contribution to any zooarchaeologist’s bookshelf, and will certainly be of interest to the wider archaeological and ecological communities as well.”—*Canadian Journal of Archaeology*

About the Author

Jack M. Broughton is a professor of anthropology at the University of Utah where he teaches archaeology, osteology, and zooarchaeology and holds an adjunct appointment in vertebrate zoology at the Natural History Museum of Utah.

Shawn D. Miller is an associate instructor of biology at the University of Utah and will receive his PhD in Biological Anthropology at the end of 2015. He is a coauthor of the *Atlas of Human Anatomy*, the educational software *Real Anatomy*, and the *Human Anatomy Interactive Atlas*.

Users Review

From reader reviews:

Gregory Phipps:

The ability that you get from *Zooarchaeology and Field Ecology: A Photographic Atlas* may be the more deep you rooting the information that hide into the words the more you get thinking about reading it. It does not mean that this book is hard to comprehend but *Zooarchaeology and Field Ecology: A Photographic Atlas* giving you enjoyment feeling of reading. The writer conveys their point in selected way that can be understood through anyone who read this because the author of this publication is well-known enough. This kind of book also makes your vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having that *Zooarchaeology and Field Ecology: A Photographic Atlas* instantly.

Janna Lefevre:

Reading a reserve tends to be new life style on this era globalization. With reading through you can get a lot of information that will give you benefit in your life. With book everyone in this world can share their idea. Guides can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors in this world always try to improve their ability in writing, they also doing some analysis before they write to the book. One of them is this Zooarchaeology and Field Ecology: A Photographic Atlas.

Margie Rodriguez:

Precisely why? Because this Zooarchaeology and Field Ecology: A Photographic Atlas is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will jolt you with the secret this inside. Reading this book beside it was fantastic author who have write the book in such remarkable way makes the content on the inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of rewards than the other book possess such as help improving your skill and your critical thinking technique. So , still want to hold off having that book? If I have been you I will go to the guide store hurriedly.

Rebecca Farley:

That book can make you to feel relax. This kind of book Zooarchaeology and Field Ecology: A Photographic Atlas was colorful and of course has pictures around. As we know that book Zooarchaeology and Field Ecology: A Photographic Atlas has many kinds or category. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading that will.
